60

20

65

22

70

25

75

27.

Solution:

Operating Temp. (°C)	Fuel Consumption. (L/hr)	Distance. (58°C)
40	12	18
45	14	13
✓ 50	15	8
✓ 55	18	3
✓ 60	20	2
✓ 65	22	7
70	25	12
75	27	17

Fuel consumption of 58°C is to be predicted.
K=3

$$\text{Avg} = \frac{15^{22} + 18 + 20}{3} = \frac{53}{3} = \underline{\underline{17.66}} \text{ L/hr.}$$
